Project Name : **Livestock Management**

Couse Name: Database Lab

Couse ID: CSE 3104

Semester : FALL 2018

Student ID : Student Name

160204039 Rashedun Nobi Chowdhury

160204048 Sujoy Chowdhury

Introduction: The project is on livestock management. Here, we've focused on a project that can be implemented on a specific district and to manage the livestock of the specific place

Motivation and Objective: Currently there aren't many good livestock management software in Bangladesh, we are trying to address that issue with our software. The software offers a system where we can have 3 different type of users, and we will allow them an immersive experience throughout the software. Each user when logged in will have different UI and all the data will be specified just for him so that there is not any redundancy. We are hoping this software will allow the District Livestock Officer to better manage the livestock of their districts.

Database Tables:

Table 01: Admin Table

Field	Type	Constrain
Username	varchar(30)	UNIQUE NOT NULL
Password	varchar(64)	Not Null
Usertype	varchar(30)	Not Null
Token	Int	P.K(IS: 310472)

Table 02: Owner Table

Field	Type	Constrain
OwnerId	int	P.K(IS: 5001)
Token	Int	F.K(Admin)
Name	varchar(50)	Not Null
Address	varchar(100)	Not Null
Contact No	varchar(11)	Check Like('01%')
Email	varchar(64)	Not Null

Table 03: Farms Table

Field	Type	Constrain
FarmId	int	P.K(IS:1001)
OwnerId	int	F.K(Owner)
Location	varchar(100)	Null
Cows	int	Null
Sheep	int	Null
Goat	int	Null
Group No	int	Null
Rating	Int	Check<11

Table 04: District Livestock Officer Table

Field	Type	Constrain
Contact No	varchar(11)	P.K (Check Like 01%)
Token	int	F.K(Admin)
Name	varchar(50)	Not Null
Address	varchar(100)	Not Null
Email	varchar(64)	Not Null

Table 05: Doctor Table

Field	Type	Constrain
Doctor Id	int	P.K(IS:9001)
Name	varchar(50)	Not Null
Contact No	varchar(11)	(Check Like 01%)
Qualification	varchar(100)	Null
Assigned Group	int	Null
Expertise	varchar(20)	Null

Table 06: Caretaker Table:

Field	Type	Constrain
Caretaker Id	Int	P.K(IS:3001)
Token	int	F.K(Admin)
FarmId	int	F.K(Farms)
Name	varchar(50)	Not Null
Contact No	varchar(11)	(Check Like 01%)
Email	varchar(64)	Not Null
Address	varchar(100)	Not Null

Table 07: Animal

Field	Type	Constrain
AnimalId	int	P.K(IS:10001)
FarmId	Int	F.K(Farms)
Animal Type	varchar(25)	Not Null
Age	int	Not Null
Required Medicine	varchar(100)	Null
Gender	varchar(7)	Not Null
Weight	int	Null
Food Amount	decimal(10,2)	Null

Query Tables Construction

```
CREATE TABLE Admin(  
    Username varchar(30) UNIQUE NOT NULL,  
    Password varchar(64) NOT NULL,  
    UserType varchar(30) NOT NULL,  
    Token int IDENTITY(310472,1) PRIMARY KEY  
)
```

```
CREATE TABLE Owner(  
    OwnerId int IDENTITY(5001,1) PRIMARY KEY,  
    Token int FOREIGN KEY REFERENCES Admin(Token),  
    Name varchar(50) NOT NULL,  
    Address varchar(100) NOT NULL,  
    ContactNo varchar(11) NOT NULL CHECK (ContactNo LIKE ('01%')),  
    Email varchar(64) NOT NULL  
)
```

```
CREATE TABLE Farms(  
    FarmId int IDENTITY(1001,1) PRIMARY KEY,  
    OwnerId int FOREIGN KEY REFERENCES Owner(OwnerId),  
    Cows int NULL,  
    Sheep int NULL,  
    Goats int NULL,  
    GroupNo int NULL,  
    Rating int NULL CHECK(Rating<11),  
    Location varchar(100) NULL  
)
```

```
CREATE TABLE DistrictLivestockOfficer(  
    ContactNo varchar(11) PRIMARY KEY CHECK (ContactNo LIKE ('01%')),  
    Token int FOREIGN KEY REFERENCES Admin(Token),  
    Name varchar(50) NOT NULL,  
    Address varchar(100) NOT NULL,  
    Email varchar(64) NOT NULL  
);
```

```
CREATE TABLE Doctor(  
    DoctorId int IDENTITY(9001,1) PRIMARY KEY,  
    Name varchar(50) NOT NULL,  
    ContactNo varchar(11) NOT NULL CHECK (ContactNo LIKE ('01%')),  
    Qualification varchar(100) NULL,  
    AssignedGroup int NULL,  
    Experties varchar(20)  
)
```

```
CREATE TABLE Caretaker(  
    CaretakerId int IDENTITY(3001,1) PRIMARY KEY,  
    Name varchar(50) NOT NULL,  
    ContactNo varchar(11) NOT NULL CHECK (ContactNo LIKE ('01%')),  
    Email varchar(50) NOT NULL,  
    Address varchar(50) NOT NULL,  
    FarmId int FOREIGN KEY REFERENCES Farms(FarmId),  
    Token int FOREIGN KEY REFERENCES Admin(Token)  
)
```

```
CREATE TABLE Animal(  
    AnimalId int IDENTITY(10001,1) PRIMARY KEY,  
    FarmId int FOREIGN KEY REFERENCES Farms(FarmId),  
    AnimalType varchar(25),  
    Age int NOT NULL,    --in months  
    RequiredMedicine varchar(100) NULL,  
    FoodAmount decimal(10,2) NULL, --in grams  
    Gender varchar(7) NOT NULL,  
    Weight int NULL      --in kg  
)
```

Query Insertion of Data

Doctor Table:

```
INSERT INTO Doctor(Name, ContactNo, Qualification, Experties)
VALUES('Dr Tuna', '01817091221','MBBS', 'Cows')
```

```
INSERT INTO Doctor(Name, ContactNo, Qualification, Experties)
VALUES('Dr Farhana', '01927091441','Paramedical', 'Cows')
```

```
INSERT INTO Doctor(Name, ContactNo, Qualification, Experties)
VALUES('Dr Tirtho', '01819462341','MBBS', 'Sheep')
```

```
INSERT INTO Doctor(Name, ContactNo, Qualification, Experties)
VALUES('Dr Xia', '01617053482','MBBS', 'Cows')
```

```
INSERT INTO Doctor(Name, ContactNo, Qualification, Experties)
VALUES('Dr Zahin', '01517685137','Paramedical', 'Goats')
```

Animal Table:

```
INSERT INTO Animal VALUES(1001,'Cow', 9, 'none', 250, 'Male', 10)
```

Farms Table:

```
INSERT INTO Farms (OwnerId, Location) VALUES (5004, 'birulia')
```

```
INSERT INTO Farms (OwnerId, Location) VALUES (5004, 'chittagong')
```

Query for Value Update:

Update Query:

Farms Table:

UPDATE FARMS SET Cows = 2 WHERE farmId = 1001

UPDATE FARMS SET goats = 1 WHERE farmId = 1001

UPDATE FARMS SET sheep = 1 where farmId = 1001

UPDATE Farms SET GroupNo = 1 WHERE FarmId = 1001

UPDATE Farms SET Rating = 8 WHERE FarmId = 1001

UPDATE Farms SET Location = 'Beribadh' where farmId = 1001

Caretaker Table:

UPDATE Caretaker SET FarmId=1002 WHERE CaretakerId = 3002

Doctor Table:

UPDATE Doctor SET AssignedGroup = 1 WHERE DoctorId = 9001

Select Query:

```
SELECT * FROM Farms
```

Selection with Condition:

```
SELECT * FROM Animal WHERE FarmId = 1001
```

```
SELECT * FROM Animal WHERE FarmId = 1001 AND AnimalType = 'COW'
```

```
SELECT * FROM Animal WHERE FarmId = 1001 AND AnimalType = 'GOAT'
```

```
SELECT * FROM Animal WHERE FarmId = 1001 AND AnimalType = 'SHEEP'
```

```
SELECT * FROM Caretaker WHERE FarmId IS NULL
```

```
SELECT FarmId FROM Farms where OwnerId = 5003
```

```
SELECT * FROM Farms WHERE OwnerId = 5003
```

```
SELECT * FROM Farms WHERE GroupNo = 1
```

```
SELECT * FROM Admin WHERE Username = 'malihachy'
```

```
SELECT * FROM Owner WHERE Token = 310473
```

```
SELECT * FROM Caretaker WHERE Token = 310472
```

```
SELECT * FROM DistrictLivestockOfficer WHERE Token = 310475
```

Selection with Order By:

```
SELECT * FROM Farms ORDER BY Rating DESC
```

```
SELECT * FROM Farms ORDER BY Location
```

Query for Aggregate functions:

```
SELECT AnimalType, COUNT(AnimalId) AS 'Number'  
FROM Animal WHERE FarmId = 1001  
GROUP BY AnimalType
```

Query for the Join Operation:

```
SELECT Farms.FarmId, Owner.Name, Owner.ContactNo, Farms.Rating  
FROM Farms INNER JOIN Owner  
ON Farms.OwnerId = Owner.OwnerId
```

Query used by the form of sub query:

```
SELECT * FROM Doctor  
WHERE AssignedGroup = (SELECT GroupNo FROM Farms WHERE FarmId = 1001)
```

```
SELECT * FROM Caretaker  
WHERE FarmId IN  
(SELECT FarmId FROM FARMS WHERE OwnerId = 5003)
```

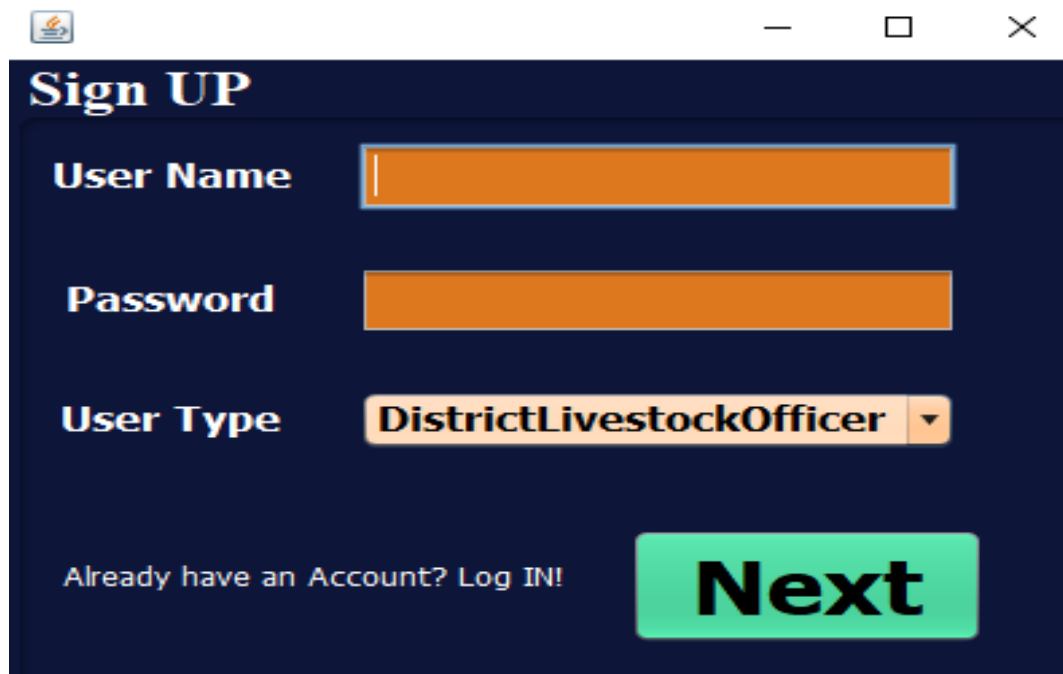

ScreenShots of my Project's interface Deisgn:

Image 01: Welcome Page

Image 02: Log IN Page

A screenshot of a web application window titled "Sign UP". The window has a dark blue background. It contains three input fields: "User Name" with an orange text box, "Password" with an orange text box, and "User Type" with a dropdown menu showing "DistrictLivestockOfficer". Below these fields is a link "Already have an Account? Log IN!" and a large green button labeled "Next".

A screenshot of a web application window titled "Home". The window has a white background. It features a large illustration of a caretaker wearing a brown hat, an orange shirt, and blue overalls, holding a wooden staff. To the left of the caretaker are two white buttons with red text: "INSERT New Animal" and "SEARCH For Animals".

Entity Relationship Diagram:

Conclusion:

This software is our first step towards a proper management of the livestock. In future we hope to implement this database system in a such a way where multiple users will be able to use it simultaneously from anywhere. Specially owners where many of them don't live in the rural side of the country. We also hope to better configure the tables so that they are able to meet the needs of users of all 3 categories.
